Your Comments: The Portland Harbor Superfund Site Cleanup is not an easy task , but the Proposed Cleanup Plan must end in the removal of the Fish Consumption Advisory so eating fish from the Lower Willamette is desirable and just as safe as eating fish from anywhere else in the Willamette River System. This really needs to happen within 20 years, a very achievable target. Creating a toxic waste disposal dump in our river is not acceptable—toxic dredged sediments must go to an appropriate landfill. The current draft cleanup plan relies too much on “monitored natural recovery,” pretty much a “do-nothing” strategy that leaves pollution in the river in the hopes that it will either be covered over or flushed downstream. We need better than that.
